

Schoeller Allibert Announces Premier Distributor

April 24, 2015 by [Rick LeBlanc](#)

André Wade of Hanson PH right and Garry Thorpe of Schoeller Allibert

Schoeller Allibert, a world leader in plastic reusable transit packaging (RTP), has appointed three Premier Distributors to simplify and streamline the distribution process for its customers. One of these is Hanson PH.

Based in Huddersfield, [Hanson](#) PH was originally built to stock the Arca range of products including the Integra ALC, System 9000, Big Box and Euros but a full range of Linpac Allibert origin products are now stocked ready for next day delivery. Hanson PH specialises

in supporting the end user and mail order networks with smaller quantities of product with no minimum order quantity.

Schoeller Allibert's Premier Distributors liaise closely with Garry Thorpe, National Distributor Sales Manager, who said: "Hanson PH is the ideal partner to fulfil urgent customer orders within the RTP market thanks to its experienced team which has extensive knowledge of our products and services. Stocking a wide range of Schoeller Allibert products, from our well-known attached lid distribution, euro stacking and 180 degree nesting containers to folding and solid Big Box bulk containers to wheeled dollies and a choice of pallets, Hanson PH is ideally placed to advise on RTP solutions for transporting and storing goods securely."

"The role of our specialist Premier Distributors is key for Schoeller Allibert's operations, providing a reliable source from which mail order customers, end user and reseller customers obtain their plastic containers."

For immediate response to any enquiry please contact Andre Wade on 01484 500418 or by e-mail at info@hansonph.com
